C4 dynamics-safe
1.42x erasure
$W^2 \sim 7.85 \times 10^{-242}$ at E2 $m = 8$;
representable in float64 but operationally zero
in the FFT field solve, ~225 decades below relative roundoff
Landau protected mode: $(m, N_x) = (1, 64)$
E2 protected mode: $(m, N_x) = (12, 128)$
C4 dynamics-safe: $\sigma = 1\,\Delta x$
Landau MISE optimum: $\sigma = 6\,\Delta x$
LOO-CV: $\sigma \geq 60\,\Delta x$
